

## Plastic Edging + Irrigation Attachment – above or Below ground garden beds and Turf

### 1. General

#### 1.01 Description

Plastic Edging can be used in hard and soft landscape areas with connections available for 13mm and 19mm poly-pipe. Used around garden and turf perimeters where irrigation is critical.

#### 1.02 Submittal

Manufacturer’s literature along with a sample 200mm section + irrigation components of material if requested

#### 1.03 Delivery

Can be coordinated directly with manufacturer or authorized distributor of Hedge. Call +852 9673 7145 for quotations and material coordination. Material should be ordered and accepted in original shipping cartons of standard size. Material should be stored in a flat area with cartons protected from rain. Unpacked components are weather resistant.

### 2. Product

#### 2.01 Product

As provided by Hedge, Hong Kong.

#### 2.02 Material

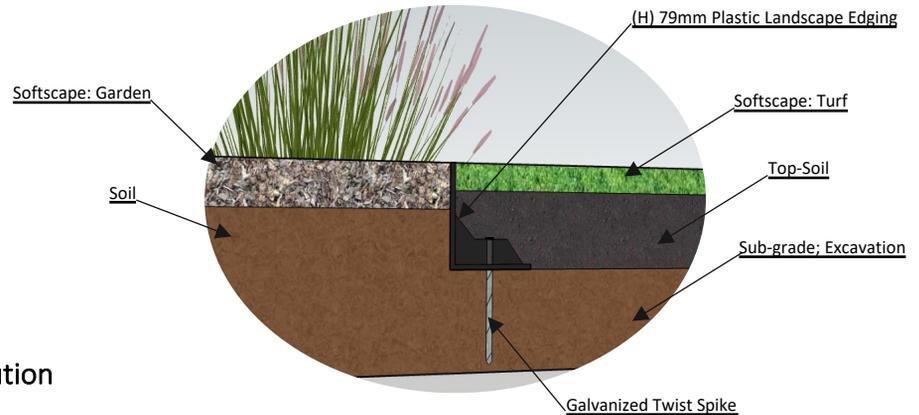

Irrigation clip attachment to be manufactured from Polypropylene (PP) Plastic injected mould with a UV protection coating and hardness of 32Mpa. Plastic edging to have connection points for irrigation clip every 180mm.

#### 2.03 Joining/ Connection Systems

Clips (male) to be inserted into the “female” section provided on the plastic edging.

#### 2.04 Finish

All irrigation clips is protected from weather corrosion and abrasive soil types.

### III. Execution

#### 3.01 Site Inspection

Check to ensure that all connection points are clean and free of debris. Ensure that plastic edging is installed and fixing complete. Ensure the work space is free of potential hazards.

#### 3.02 Measurement

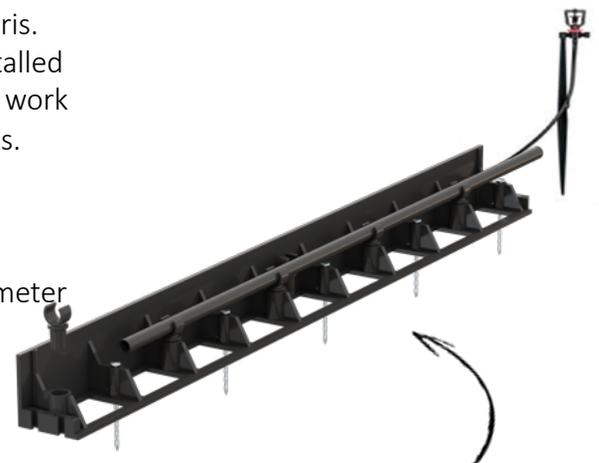

Determine the amount of Clips required by measuring the perimeter of the edging and divide by the spacing required.

#### 3.03 Installation

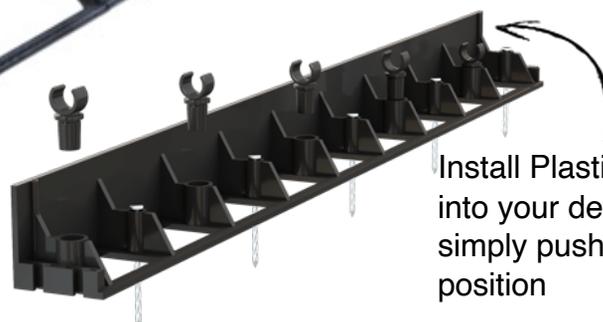

For areas where move curves are required install irrigation clips every 180-360mm or as required.

#### 3.04 Back Filling

Once the irrigation installation is complete, back fill up to grade / base of poly-pipe with mulch, rock, topsoil, or specified cover.

Click poly pipe or dripline into position and easily connect your sprinklers at the desired length throughout your garden

Install Plastic Garden Edging into your desired shape and simply push fit irrigation clips into position
